The Washington State Department of Transportation is applying for a noise variance to allow 30 non-consecutive nights of construction work from June 1 to December 31, 2015, to allow WSDOT's contractor to replace concrete panels, conduct pavement shoulder repairs and pavement markings.

Nighttime work will minimize congestion impacts to drivers, businesses, school buses and local commuters during the day, and is safer for workers and traveling public.

Construction equipment used during nighttime operations will include, but is not limited to dump trucks, generators, light plants, paving machines, planning grinders, compaction rollers, air compressors and saw cutters for asphalt and concrete. Noise levels resulting from the project's construction activities will generate peak noise levels of 68 to 85 dBA as perceived at 50 feet from the WSDOT property line. When feasible, temporary noise shields will be placed around construction equipment.

ANY AND ALL INTERESTED PARTIES are invited to present testimony or submit letters in support or opposition to the request. Correspondence should be addressed to Maria Laura Musso-Escude, Air Quality, Acoustics and Energy Specialist, WSDOT NW Regions Environmental Office, P.O. Box 330310, Seattle, WA 98133-9710. For more information about this Washington State Department of Transportation project, call Maria Laura Musso-Escude at (206) 440-4554.
